

# Challenges we Encountered

The first challenge we had was scheduling the meeting there was a little time difference and we were both busy with other stuff. So instead of having the meeting during the day we had our meeting at night where we both had a free time.

The other challenge was there was some connection problems from both of our side due to that our meeting took about one hour. For some of the questions our answers were not audible so we exchanged our answers in our DM's.

# Ibukun Bakare BIO

Ibukun Bakare is a business graduate from the University of Lagos, Nigeria. She is married and blessed with a beautiful baby. A devoted lover of Christ, Ibukun's journey into the tech world began during his third year at university. Inspired by a friend's success in programming, she eagerly joined a weekly coding boot camp organized by the engineering department for non-tech students. This program ignited his passion for technology, and he quickly mastered HTML, CSS, and JavaScript. Ibukun's dedication and enthusiasm for learning have paved the way for a promising career in tech.

# The Question's I Asked

1. Can you share a bit about your tech background and what initially sparked your interest in technology?

My tech journey started when I was in my third year at the University when the engineering department of my school started a program to train non-techies every Wednesday on how to code. It was a wonderful program for me, cos I'd wanted to learn programming when a friend talked about it and how it involved someone earning a lot of money from it.

2. What has been the most rewarding project or experience you've had during your time with 10 Academy?

I was a bit busy these past few weeks so I have only been able to submit one of the exercise only but . The most rewarding experience is being around group of peers that are like minded.

3. Have you encountered any significant challenges or obstacles in your journey so far, and how did you overcome them?

trying to keep up with all the tutorials and challenges have been challenging for me with my work and having a child to take care of but I am trying to manage.

4. Are there any particular technologies or programming languages that you are especially passionate about or have expertise in?

I am really passionate and have experience in JavaScript.

5. What's one interesting fact about yourself that most people might not know,

I am a very friendly and fun person and I am a lover of Christ.

# The Question's She Asked

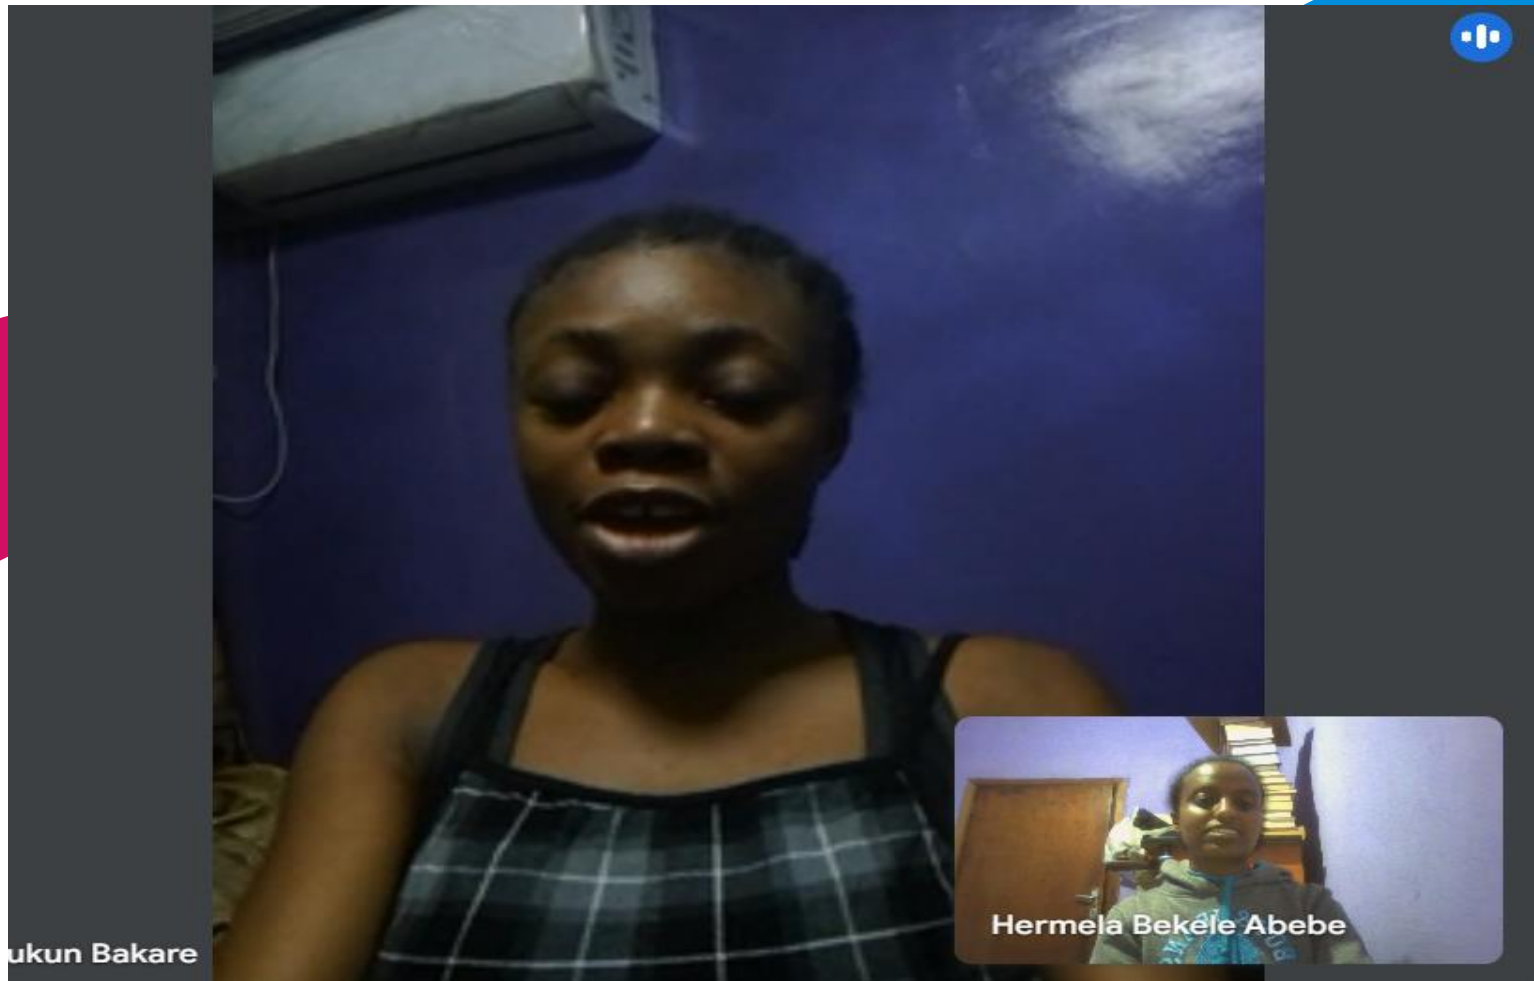

---

- 1 Can you share a bit about your tech background?
- 2 What has been the most rewarding project or experience you've had during your time with 10 Academy?
- 3 Have you encountered any significant challenges or obstacles in your journey so far, and how did you overcome them?
- 4 What programming languages are u passionate about ?
- 5 Will you love to come to my country someday?

# Thing I Learned From The Exercise

1. This exercise made get out of my comfort zone and get to know another peson that on a similar journey.
2. I learned a lot about the tech industry and on how to show case my talent from my peer mentee.
3. I learned on how to prepare for a team interview and how to prepare a question that is tailored to a specific person by look informations from their social media.
4. I have build a great friendship with my peer to help each other inside and outside of this program.
5. For my future career, my peer was gracious enough to share with me some internships, and has given me great advice on how to excel in the tech world.

We have shared our LinkedIn account and are now connected. For the future we will be connecting through both LinkedIn and our slack DM's. we have decided to have meetings often to check on each others progress.
